Full Stack Developer

PHP • Laravel • Vue.js • React • TypeScript • Go • APIs • Docker

Full Stack Developer with approximately 6 years of experience building web applications across both backend and frontend. My primary stack includes PHP, Laravel, Vue.js, Nuxt, React, TypeScript, Go and Docker, developing REST APIs, administrative systems, integrations and modern user interfaces. I have experience building new products, modernizing legacy systems, standardizing development environments and establishing software development best practices. My previous background in digital marketing and e-commerce gives me a strong business perspective and helps me translate business requirements into technical solutions. I am currently pursuing a Bachelor's degree in Computer Science.

PRINCIPAIS CONQUISTAS

- Approximately 6 years of Full Stack development experience.
- End-to-end web application development.
- Legacy system modernization and continuous improvement.
- Personal projects built with Laravel, Go, Nuxt, Flutter and React.
